Dear Colleague,

I am delighted to invite you to the 15<sup>th</sup> Edition of our “Best of Cardiology” series:

**Medanta Echo n Cardiology: Today & Tomorrow**  
**April 11<sup>th</sup>–12<sup>th</sup> 2026**

In the last three decades the complexity of patients with heart diseases presenting to the cardiologist has multiplied several fold and the artificial divisions between clinical cardiology, non-invasive cardiology, interventional cardiology and electrophysiology have actually blurred significantly. The heart team approach also includes the cardiothoracic and vascular surgery team as well. All this has resulted in clinical decision making a team effort with the patient in the center and the focal point.

This meeting of minds aims at this very nuance, bringing all stakeholders to the patient and thus starting a cascade of events to the relief of the patient. This, therefor, is the theme and mission of the meeting:

**“Clinical Matters That Matter Most”**

In this year’s scientific feast, you will have the opportunity to interact with nationally revered and internationally renowned faculty as they discuss the various facets of the theme of the meeting. In the plethora of Conferences, Seminars, Conclaves, Meetings et al that you encounter every month throughout the length and breadth of this great land you will find this meeting of minds a truly inspiring experience– two days of sheer nuance of clinical matters that matter most in cardiology today.

My team and I therefore look forward to welcoming you to the 15<sup>th</sup> edition of our “Best of Cardiology” series, in the serene setting of the “Hotel Leela Ambience”, in the heart of Gurugram.

Best Wishes

Dr Ravi R Kasliwal
